

APPLICATION NOTE - IP RECORDING FOR AVTEC SCOUT CONSOLE SYSTEMS

Solution Overview:

Eventide is an Avtec-Certified call recording provider for the Scout™VoIP console system. NexLog DX-Series recording solutions (and original NexLog recorders) reliably capture, record, and archive the IP audio streams and call-related metadata from Avtec's Scout™ console system.

Recording Capabilities:

- Records select and/or unselect audio from Scout consoles
- Records talk groups that are interfaced to the Scout system
- Records conventional channels that are interfaced to the Scout system
- Records calls on telephony circuits that are interfaced to the Scout system

Console and Endpoint Metadata option:

- Captures and displays endpoint events and identities (including Push to Talk ID, Talk Group ID, Caller ID, and more)
- Metadata and related events are accurately displayed on Eventide's MediaWorks DX multi-channel graphical timeline
- Filter and find recordings using metadata search tags

Avtec Certification:

The NexLog family of communications recorders has earned Gold-CE certification, the highest designation in the Avtec interoperability testing program. This distinction assures that Eventide's recorders meet Avtec's stringent requirements for compatibility with the Scout console system.
