

Application Note - Recording for Tait P25 Trunked Radio Systems

Solution Overview:

Eventide NexLog DX-Series recording solutions (and original NexLog recorders) reliably record and archive calls & metadata on Tait P25 trunked radio systems. Talk Group audio streams are reliably captured, recorded, and archived. Recordings are immediately available for replay, instant recall, incident reconstruction and export. The same recording system can also record dispatch consoles, telephones, NG911/911 call taking, additional radio sources and PC screens.

Audio Capture Method:

Recording of P25 Talk Group audio via network-based ISSI connection

P25 Decryption Support:

Optional OTAR integration to Tait KMF, or load keys from Tait Key Loader

Metadata Search Parameters:

- Radio ID
- Talk Group ID
- Date & Time
- More

About Eventide:

- Eventide is a member of the Tait Global Partner Program, and is an OEM supplier of P25 and DMR recording systems to Tait.
