

## NexLog Application Note

### Avtec-Certified Call Recording for Scout VoIP Console Systems in Critical Communications Environments

Eventide's NexLog recording technology reliably captures, records, and archives the Voice over Internet Protocol (VoIP) audio streams and call-related metadata from Avtec's Scout™ console system. Eventide's recording technology can log and track VoIP audio sourced from Scout, ranging from eight to 1,600 talk paths, with the ability to track metadata including Push to Talk ID, Talk Group ID, Caller ID, and more.

#### Recording and playback capabilities:

- Select and/or unselect audio from Scout consoles.
- Talk groups that are interfaced to the Scout system.
- Conventional channels that are interfaced to the Scout system.
- Calls on telephony circuits that are interfaced to the Scout system.

#### Console and Endpoint Metadata option:

- Captures and displays endpoint identities and detailed activities.
- Metadata and related events are accurately displayed on a graphical timeline.
- Filter and find recording using metadata search tags.

#### Avtec Certification:

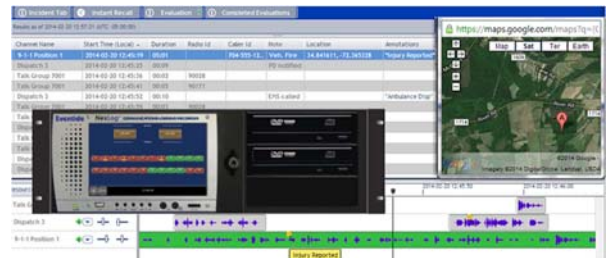

The NexLog communications recorder has earned Gold-CE certification, the highest designation in Avtec's "Works with Scout" interoperability testing program. This distinction assures that Eventide's recorders meet Avtec's stringent requirements for compatibility with the Scout console system.

#### About Avtec Inc:

Avtec, Inc. provides pure VoIP dispatch console solutions for critical communications environments. For more than 35 years, clients have chosen Avtec's award-winning technology for their command and control centers. There are more than 5,000 Scout Voice over Internet Protocol (VoIP) consoles installed worldwide. Visit [www.avtecinc.com](http://www.avtecinc.com) to learn more.
