

### ED137 Next Generation VoIP Recording for ATC/ATM

NexLog recorders support ED137b-Part4 VoIP recording for:

- Ground Radio Stations (GRS)
- Controller Working Positions (CWP)
- Voice Communications & Control Systems (VCCS)

#### About Eventide:

- Eventide recorders have been deployed at ATM/ATC centers in over 50 countries.
- Member of EUROCONTROL VOTE (VoIP in ATM Implementation and Transition Expert).
- Participant in EUROCAE Working Group WG-67.

#### About NexLog Communications Recorders:

- Add VoIP, E1, digital phones, 2-wire analog and 4-wire analog interfaces in one server.
- Includes redundant power supplies, redundant hard disks, Linux OS and SQL database.
- Time synchronization via NTP or optional IRIG-B.
- Access, quarantine and export recordings via touch screen or MediaWorks PLUS software.

#### Other ATC/ATM Recording and Replay Options:

- TopSky interface; audio synchronization to standard TopSky CWP air situation replay.
- At the Glass Screen Recording with THRUPUT Ltd.
- Eventide Replay API.
