

NexLog Application Note

Call Recording for the ICOM IDAS Radio System

NexLog IP-based call recording systems provide archival and instant recall recording for iCOM IDAS digital multi-site conventional radio systems. IP-audio and metadata that are sent from IDAS comparators are reliably recorded and archived. Recordings are instantly available for replay, research, incident reconstruction and export. The same NexLog system can also record dispatch consoles, telephones, other radio sources and PC screens.

Audio Capture Method:

- Recording of IP audio feeds from IDAS comparators

Codec Support:

- AMBE+2 Vocoder (NXDN Standard)

Metadata Search Parameters:

- Radio ID
- Destination ID/Group ID
- Date & Time

About Eventide:

Eventide is an OEM supplier of NexLog recording solutions to iCOM.
