

## NexLog Application Note

### Recording for Controller-less MOTOTRBO™ Systems

NexLog recording systems provide reliable IP-based call recording for controller-less MOTORBO systems. Recordings are instantly available for replay, incident reconstruction and export. The same NexLog system can record telephones, analog radio and PC screens.

#### MOTOTRBO Topologies Supported:

- IP Site Connect
- Capacity Plus
- Linked Capacity Plus

#### Audio Capture Method:

- IP recording via network, directly from compatible repeaters with NAI-Voice licensing.

#### Metadata captured:

- Source ID
- Called Radio ID or Group ID
- Call Type
- Site ID (for Linked Capacity Plus)

#### About Eventide:

Eventide is a Motorola-licensed Applications Development Partner for the North America, EMEA and APAC regions. Eventide recording systems offer advanced connectivity, exceptional incident management tools, and outstanding Linux-based system reliability.
