

## NexLog Application Note

### TopSky-ATC Audio Synchronization with Air Situation Replay

NexLog recorders support synchronized audio playback:

- TopSky (TopSky X) air situation replay can control audio replay from the NexLog recorder.
- EUROCAT-C air situation replay can control audio replay from the NexLog recorder.

#### About Eventide:

- Eventide recorders have been deployed at ATM/ATC centers in over 50 countries.
- Member of EUROCONTROL VOTE (VoIP in ATM Implementation and Transition Expert).
- Successful Thales TopSky field deployments in 2015

#### About NexLog Communications Recorders:

- Add VoIP, E1, digital phones, 2-wire analog and 4-wire analog interfaces in one server.
- Includes redundant power supplies, redundant hard disks, Linux OS and SQL database.
- Time synchronization via NTP or optional IRIG-B.
- Access, quarantine and export recordings via touch screen or MediaWorks PLUS software.

#### Other ATC/ATM Recording and Replay Options:

- ED137b-Part4 (VoIP ATC/ATM)
- At the Glass Screen Recording with THRUPUT Ltd.
- Eventide Replay API.
