

NexLog Application Note

IP Call Recording for the Zetron DCS-5020 Digital Console System

Eventide NexLog communications recorders provide archival and instant recall recording for the Zetron DCS-5020 Digital Console System. Audio calls and detailed metadata are reliably captured, recorded, and archived. Recordings are immediately available for recall, replay, incident reconstruction and export. The same NexLog system can also record, telephones, trunked radio, conventional radio and PC screens.

Connectivity:

- Recording is via E1 connectivity to the Zetron DCS-5020 Digital Console System.

Audio Format Supported:

- G.711 64kbps (aLaw or uLaw).

Metadata Capture:

- Detailed call-related metadata is captured via integration with the DCS-5020 CDR.

About Eventide:

Eventide is an OEM supplier of recording systems to Zetron. NexLog recorders offer strong interoperability with Zetron's MAX Dispatch system, MAX Call Taking system, AcomNOVUS Advanced Communication system and DCS-5020 Digital Console System.
