

NexLog Application Note

IP Call Recording for Zetron MAX Call Taking

Eventide NexLog communications recorders provide archival and instant recall recording for the Zetron MAX Call Taking system. IP audio streams are reliably captured, recorded, and archived. Recordings are immediately available for recall, replay, incident reconstruction and export. The same NexLog system can also record dispatch systems (including MAX Dispatch), telephones, trunked radio, conventional radio and PC screens.

Connectivity:

- Recording of IP audio via port mirroring (SPAN port).

Audio Format Supported:

- G.711 (64kbps).

Metadata Capture:

- 9-1-1 ANI/ALI integration option.
- MAX-CT Metadata integration (expected availability during 2016).

About Eventide:

Eventide is an OEM supplier of recording systems to Zetron. NexLog recorders offer strong interoperability with Zetron's MAX Dispatch system, MAX Call Taking system, ACOM Console system and DCS-5020 Console system.
