

## NexLog Application Note

### IP Call Recording for Zetron MAX Dispatch

Eventide NexLog communications recorders provide archival and instant recall recording for the Zetron MAX Dispatch System. IP audio streams and metadata are reliably captured, recorded, and archived. Recordings are immediately available for recall, replay, incident reconstruction and export. The same NexLog system can also record 9-1-1 and NG9-1-1 calls, telephones, trunked radio, conventional radio and PC screens.

#### Connectivity:

- Recording via dedicated SIP-trunk(s) from Zetron Voice Logging Gateway(s).
- Connection to multiple Voice Logging Gateways (VLG) is fully supported.

#### Audio Format Supported:

- G.711 (64kbps).

#### Metadata Capture:

- Source Caller's ID, Destination Caller's ID, Channel and more.

#### About Eventide:

Eventide is an OEM supplier of recording systems to Zetron. NexLog recorders offer strong interoperability with Zetron's MAX Dispatch system, MAX Call Taking system, ACOM Console system and DCS-5020 Console system.
